Navneet Hospital is conducting Phaco Training Programme for Ophthalmologists since 2002. During these programmes, one of the most important factor being realized is that analysis of ones own surgery is very important. Keeping this in mind, we are organising a Instruction Course on 'Basic and Advanced Phaco' on 08th & 09th August 2015 at Navneet Hospital, Solapur.

This course will emphasize on basic technical aspects related to nucleus management, irrigation-aspiration and IOL implantation in different cases.

One of the unique features of this course is to learn how to analyze the different steps of Phaco Surgery. This particular course will also highlight salient features of TORIC IOL procedure & information of Phaco Machine in Operation Theater.

In addition of being helpful to deliver the clarity in concepts of phaco, this training will also increase the confidence level of participants.

We appeal you to grab this unique opportunity

Thanks & Regards

Dr. Navneet Toshniwal
